

Introduction of Open Data Policy and License

Lucien Cheng-hsia Lin

Open Source Software Foundry, Academia Sinica, Taiwan

The speaker of this session has experience on research of general public licenses such as Free and Open Source Software licenses, Creative Commons licenses and Open Hardware licenses for years, owing to the participation of a non-profit Free and Open Source Software outreach and promotion project funded by Taiwan government. Based on a comparative analysis between Open Data policy and the other general public licensing models, the speaker will talk about the basic licensing infrastructure of Open Data and how to do it in a best practice way, based on the lessons learned from other general public area. The fundamental licensing principles extracted from Free and Open Source Software licenses will also be explained in this session, to help the audience understand the Open Data policy and strategy in a formulation way.
